Key figures B25750H series

=

MKK DCi-H (oil)

Recommended applications

Features

- Capacitance range 100 to 24 mF and voltage 900 to 5400 V DC
- Applications with high ripple voltage >400 Vrms
- Temperature range up to 85 °C hotspot
- Impregnation with vegetable (rapeseed) oil
- IEC 61071, IEC 61881-1
- Oil technology
- Stainless steel case
- Flat windings

Benefits

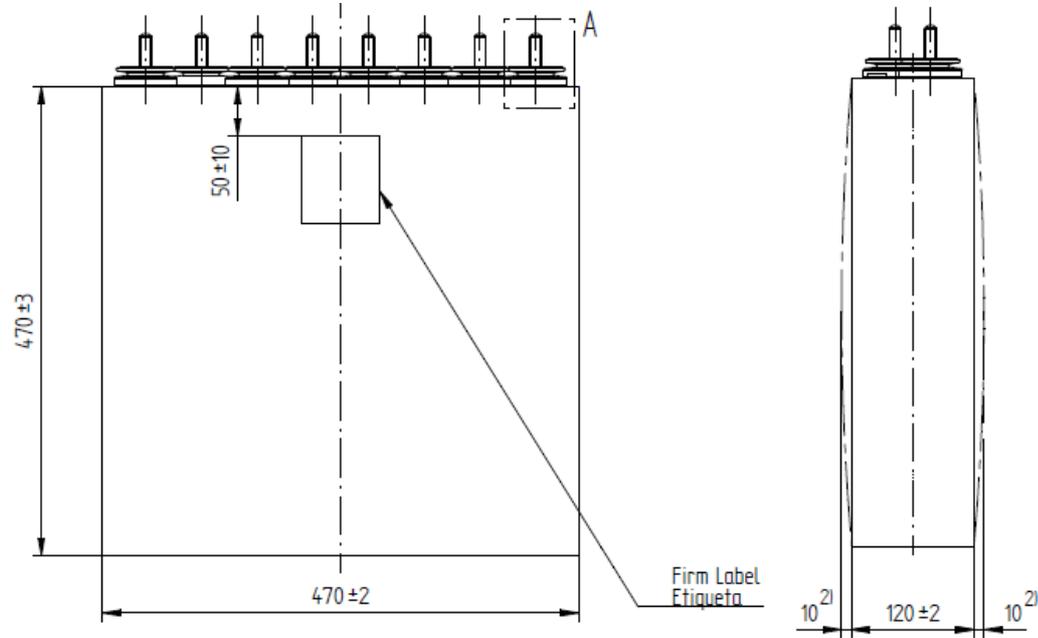

- 100% customized solution
- Hermetically sealed
- Ultra compact solution
- Life time up to 200,000 hours at hotspot temperature +85 °C
- Compatible with pressure switch device
- Design compatible with aggressive environmental conditions
- ANSYS™ simulations available upon request

Get more info [here](#)

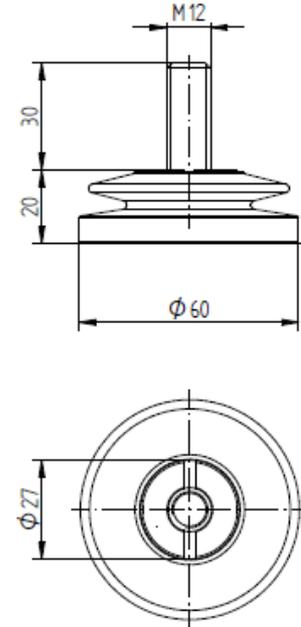

Construction

Simplified drawing: Example A

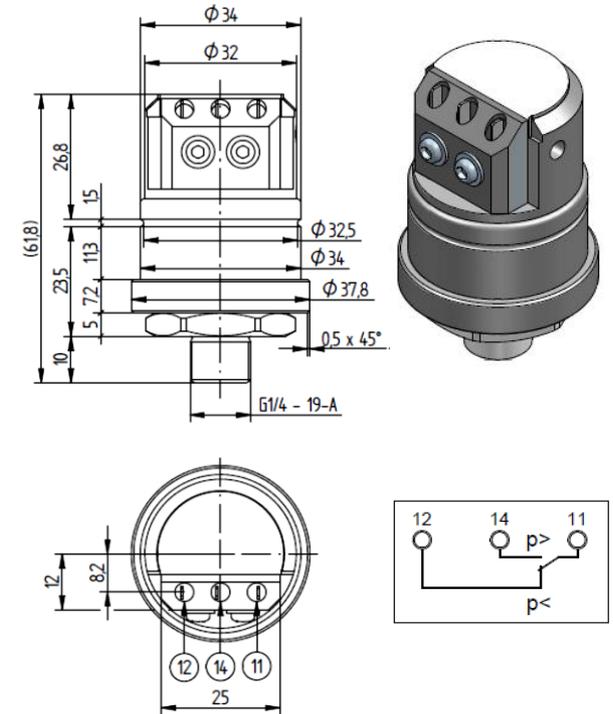

Main dimensions 470 x 120 x 470 mm

Terminal

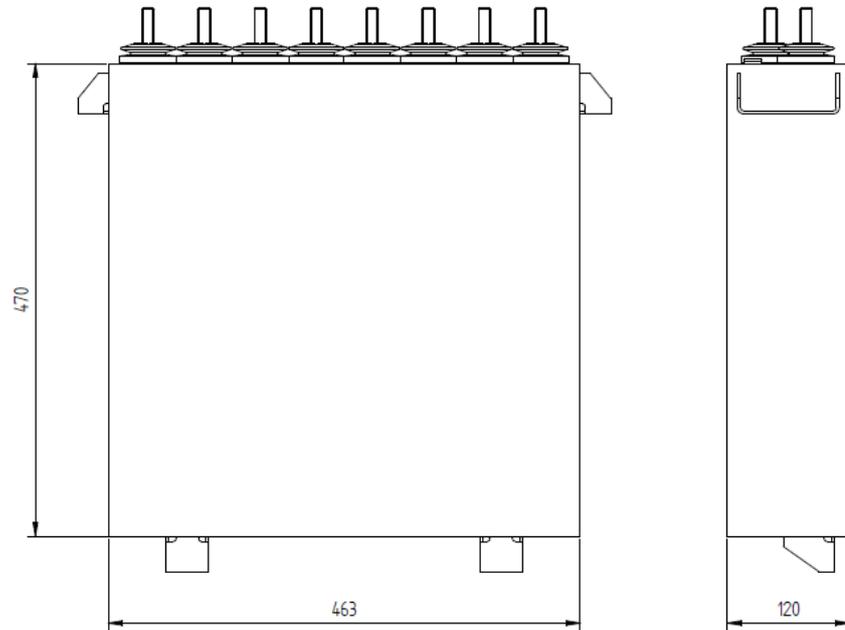

Pressure switch

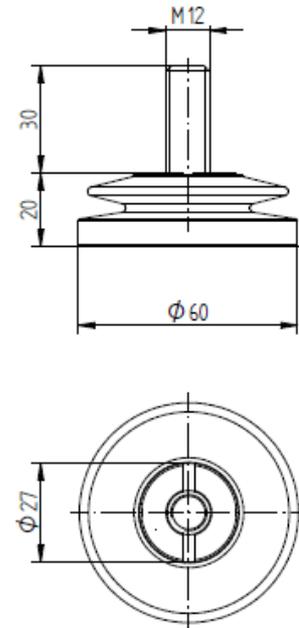

Construction

Simplified drawing: Example B

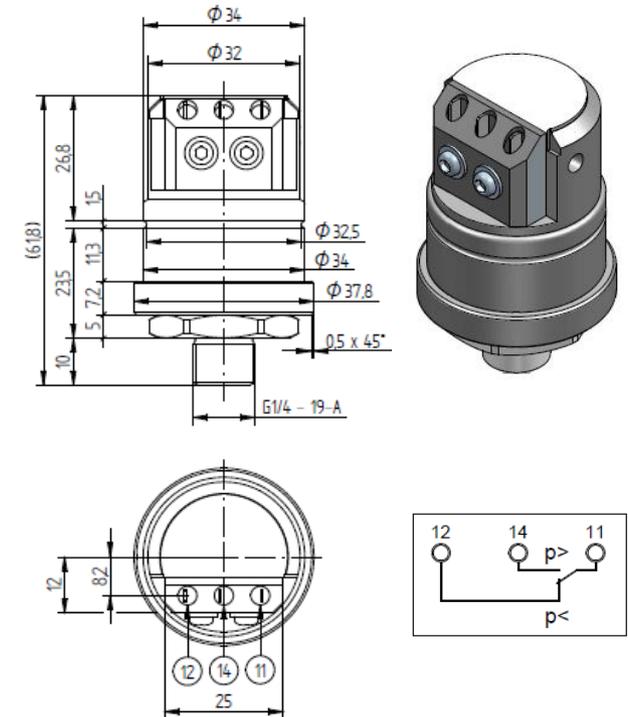

Main dimensions 463 x 120 x 470 mm

Terminal

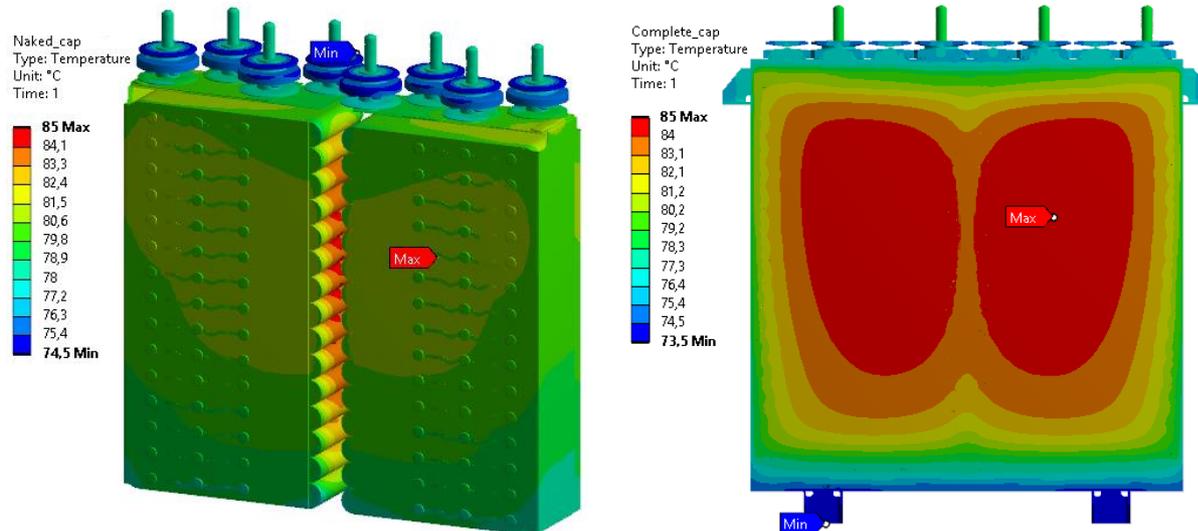

Pressure switch

Thermal & electromagnetic model: Simulation

Thermal: Hotspot and temperature mapping

Thermal model available for specific simulation according to spectrum and boundary conditions defined by the customer.

Electromagnetic

Customer input

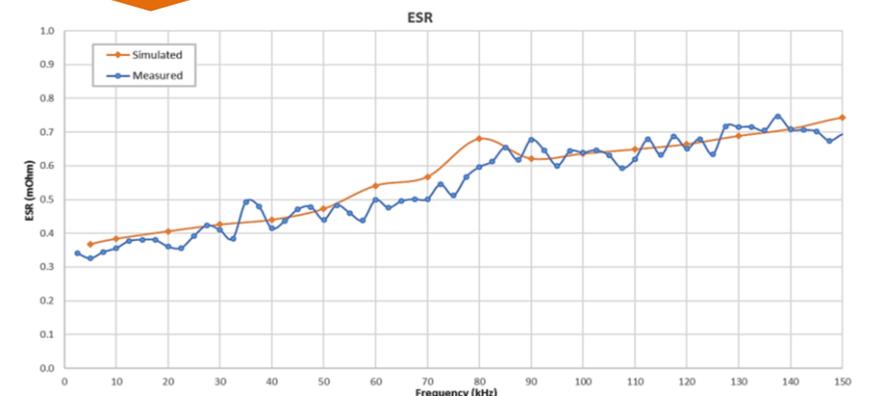

- AC current spectrum
- Boundary conditions

TDK input

- 3D model
- Electrical parameters of the capacitor (capacitor design)

Simulation

- ESR vs freq graph
